Introduction

WHO ARE WE?

Flocki Finance was founded in early 2021 by an international group of cryptocurrency traders, developers, and data analytics professionals. Driven by the principles of complete transparency and traceability, which is lacking in most defi projects right now. With our platform in full operation, users will have a high degree of risk management through our informed investing tools within the volatile space of Defi investing.

MISSION STATEMENT

Flocki Finance is a multi-chain NFT marketplace where investors can safely and securely create, trade, and swap any NFT on any blockchain, all in one place, and is one of the first to do so.

The platform's native token, FFT, can also be used to pay for fees in the marketplace. To help secure a brighter future, Flocki Finance plans to use 20% of its profits every quarter to fund a buy back & burn event to help make its supply more scarce, thus increasing its value.

VISION

Flocki Finance intends to serve as a real-time multi-chain crypto platform providing users with all the necessary tools needed to make smart and safe investment choices in the ever-growing Defi market.

Our platform will be easy to use, packed with never-before-seen features and state-of-the-art UX, backed by our utility FFT token which will be used to pay for Platform fees, reward users for staking, Hold For Exclusive NFT drops, and performing different operations on the ecosystem.

Flocki Finance is a permissionless NFT Marketplace where creators, digital artists can turn their works into digital collectibles on the blockchain.

Flocki Finance, with the core tenets of Trust, Transparency, Ease of Use, and Social Impact at its foundation, aims to provide a safe platform for any user to research, manage, and quantify their current and future crypto investments.

Flocki Finance Ecosystem

Imagine life before smartphones, you would need to carry a calculator, telephone, a photo camera, video camera, and more to have the same functionality as the iPhone. This is what Flocki is looking to provide to crypto investors.

Instead of having to individually research social network/influencer trends, vet contract code, price charts, create price action alerts, execute orders, and more all on different websites or applications.

Flocki Ecosystem Consist's of :

NFT marketplace

Flocki Finance Staking

Mostly known as NFT, "Non-Fungible Token" is a non-fungible asset that is unique and cannot be split. NFT can be connected to real-world objects. NFT provides the owner of the native digital assets (assets only exist in or originate from the digital world) with proof of ownership, which can live outside of a centralized server or repository.

NFT smart contracts record data of a project on the blockchain. This data can either be those that need to be stored in a decentralized way (e.g. properties that represent video game assets) or external links to specific resources.

NFT's are the new rave in blockchain technology

Users can create NFT's (non-Fungible tokens) of their items, Music or images, Paintings and sell them on Our NFT Marketplace. Flocki Finance aims to build a bridge between creators & blockchain Technology while also supporting the growth of native crypto NFT artists

Flocki Finance Staking is a decentralized savings protocol that offers a variety staking of services. These include Flocki Staking and Staking-As-A-Service and Liquid Staking. This range of products makes Flocki Staking the complete savings DeFi protocol in the market.

Flocki Finance Staking: Users can stake their \$FFT Tokens for a certain period of time To Earn More tokens

Staking as a Service: Staking-as-a-Service allows Flocki Finance to offer stake to all BEP20 projects (initially), making staking easy, accessible, and affordable to all the present and upcoming projects.

Any tokenized project will be able to interact with the Flocki Master Contract to create and deploy a customized staking contract where their users can stake tokens and earn pool rewards.

To create a pool, tokenized projects will pay the fee in \$FFT token.

We are on a mission to create a staking platform that is very easy to operate for end-users and pool creators.

FLOCKI FINANCE is future of Defi

We are on a mission to provide an industry-leading platform for the ever-increasing defi ecosystem while also offering analytical tools available to all cryptocurrency investors regardless of the level of trading skills or portfoliosize.

One-Stop DeFi Solution: NFT marketplace , Flocki Finance Staking Platform removes the barrier of high fees and brings in a solution to offer a low fee, easy to use and high reward DEX.

Cheap and Affordable Fees: 70% less expensive than most projects on the Ethereum Blockchain known for its insanely high gas fees.

Community driven: Flocki.Finance network will be built on governance. Upon governance launch, all the decisions will be decided by vote making the network truly decentralized.

Secure and Trused: The model of decentralized finance is naturally Trustless, and it should be kept that way when building decentralized applications. There should be no human interaction at any critical points of decentralized applications to avoid any malicious intruders. This trustlessness of blockchain technology has attracted most of the public, especially the privacy-conscious ones who do not want any centralized authority to access their precious data or funds.

Flocki Finance is centralized only up to the point where human interaction is needed to keep the platform maintained and updated.

FLOCKI FINANCE TOKEN UTILITY

Flocki Finance will be a Decentralized Autonomous Organization (DAO) as we will have to keep the ecosystem maintained and updated and there will be a lot of important decisions and changes to make as we evolve.

Instead of handing over control to one entity or organization, we have decided to go for DAO, so the \$FFT holders themselves should make the most important decisions about how Flocki Finance should operate. The DAO is the logical compromise between full centralization and decentralization, which allows the deployment of competitive products without complete centralization.

DAO will be responsible for making all decisions regarding operations and the future of the platform. Some examples of how DAO will play a significant role in the evolution of Flockii Fnanace

- Propose and update Flocki Finance features
- Set or change fees for all financial models on our ecosystem

Tokenomics

Flocki Finance \$FFT is the utility token that will power the Flocki Finance ecosystem.

Total supply: 100,000,000,000

Token Symbol: \$FFT

Token Type: BEP-20

Token Contract Address:

0x32b20ac6a7f14d334dfc77bd818e1d80f5e49d7e

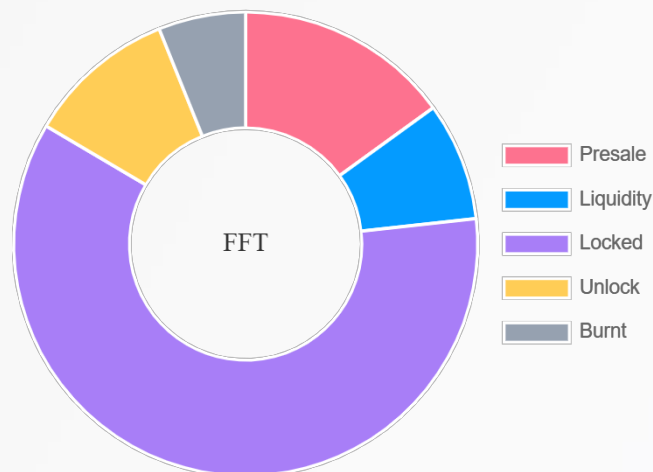

Figure 1.2: \$Flocki Finance token supply breakdown.

Distribution	Distribution of Token's %
Presale -	15%
Liquidity	8,25%
Burnt -	6,08%
Locked	60,25%
Airdrop&Bounty -	6 %

To assist the stability of Flocki Finance token price action as well as provide transparency and traceability for our investors 60,25 % of total supply was locked by Developer.

Liquidity Lockers :

Liquidity was locked for 120 days after presale was completed

Flocki Smart Burn Mechanism :

Flocki Finance will use 20 % of it`s profits from Ecosystem to buy back FFT tokens from market and burn them, which will increase the value of Flocki Finance token through deflationary mechanisms.

Phase 1

- TEAM
- MARKET RESEARCH
- TOKENOMICS / CONTACT DEPLOYMENT
- WEBSITE LAUNCH
- PRIVATE PRESALE
- PUBLIC PRESALE
- DEX TRADING LAUNCH

Phase 2

- COMMUNITY DEVELOPMENT
- NFT MARKETPLACE TESTNET LAUNCH
- PROJECT REBRANDING
- CEX LISTING
- AUDIT
- AIRDROP
- MARKETING ACTIVITIES

Phase 3

- TIER 1 CEX LISTING
- OFFICIAL LAUNCH (MAIN NET)
- PARTNERSHIP
- MARKETING
- ANALYSIS
- BUY BACK AND BURND
-

• BEYOND...

- Deployment of Mobile Flocki Platform Application (iOS/Android)
- Flocki Finance Blockchain Deployment
- Continuous Development of Novel Technologies to Enhance Ecosystem
- Develop On/Off Chain Investment Vehicles for Flocki Finance Token Holders
